An Indefinite Quantity Contract (IQC) provides for an indefinite quantity, within stated limits, of specific supplies or services to be furnished during a fixed period, with deliveries to be scheduled by placing orders with the contractor.

The solicitation will consist of one (1) Zone. It is our intent to make one (1) Prime Vendor award.

3. **ITEMS**

A. This contract is for the procurement of Total Food and Beverage support EXCEPT for Fresh Fruits and Vegetables, fresh milk, fresh bread, "branded" Bag in Box Soda, non food items and disposables. However, the government reserves the right to add these classes of food and non-food items after award. If these classes of food and non-food items are added, appropriate distribution fees will be negotiated.

4. **PRICING**

A. Pricing will be based on the following formula:
Unit Price = Delivered Price + Distribution Price

Definitions:

Unit Price - The unit price is defined as the total price charged to DSCP per unit for a product delivered to the government.

Delivered Price - The delivered price is defined as the actual last invoice price of a product that the prime vendor has paid a manufacturer or supplier for that product delivered to their distribution point. This is sometimes referred to as "landed cost".

Distribution Price - The distribution price is defined as a firm fixed price, offered as a dollar amount, which represents all elements of the contract price other than the delivered price. The distribution price typically consists of the prime vendor's projected general and administrative costs, overhead, packaging costs, transportation costs from the prime vendor's distribution point, any other projected expenses associated with the prime vendor function, and anticipated profit. This distribution price is intended to reflect the difference between the delivered price and the unit price to deliver the specified product to the ordering activity. This distribution price shall represent the amount to be added to the actual invoice price paid to the manufacturer or supplier by the prime vendor for each food or beverage item. This dollar amount shall remain constant for the complete term of the contract.

A. The Government's ordering system requires that pricing will be fixed for a certain period of time. Pricing will be at the time of order. These prices will be fixed until delivery, provided that delivery is requested within the time frame of six days starting the day after the order is placed. If delivery is not requested until after this time frame, pricing will be as of the delivery date.

1. For example, orders placed on March 1st will be priced at time of order, if the delivery is required between March 2nd and March 7th, inclusive. If delivery is not required until 8 March, or after, the order will be priced with those prices in effect at the time of delivery.

B. Vendors may change prices in their STORES Vendor Item Catalog weekly. The submissions are to be made by Thursday, to be in effect the following Sunday. All price changes must be submitted to DSCP via the 832 EDI Transaction Set. This transmission must be received by Thursday, 6:00 P M, Philadelphia time. See Attachment entitled "EDI Implementation Guidelines" for more information on the various EDI transaction sets required under this contract.

C. Vendors may submit alternate price change submissions (832 updates). However, it should be noted that prices cannot be updated more frequently than weekly. For example, it may benefit both the offeror and the government to submit prices bi-weekly on Friday.

D. The items to be procured under this contract shall be broken down into separate food categories for purposes of proposing distribution prices. For the **Distribution Price Category only**, prices are to be offered in the same manner in which you sell the product. For example, if you sell a product by the case, then the distribution price will be by the case, whereas if you sell the product by the pound or by the each, the distribution price would be listed accordingly. Distribution prices shall be formatted to no more than two (2) places to the right of the decimal point. Offerors may utilize the category listing below, or submit their version of food categories. There is an upper limit of fifty (50) categories that one may submit. The Government's food category is listed below. It is highly recommended that this list be utilized. However, deviations will be accepted provided that the additional categories are reasonable and not in excess of the 50 category limit.

5. **BACKUP PRIME VENDORS**

The offeror awarded the prime vendor contract for this zone may become a potential backup supplier for other zones (s) should a prime vendor in an adjacent or nearby zone be unable to support, one, some, or all of the customers in that assigned zone. Offeror's agreement to perform as a potential backup prime vendor is required. The assignment to act as a backup to any or all customers in another zone would be negotiated through a bilateral agreement/modification to the contract along with the appropriate distribution fees.

6. **AWARD DETAILS**

Any award made against solicitation SP0300-00-R-4042 will result in an Indefinite Quantity Contract. The Government reserves the right to make more than one award per zone.

7. **ESTIMATED VALUE / GUARANTEED MINIMUM/MAXIMUM**

A. The estimated dollar value of this total acquisition is \$20.6 million, inclusive of the base year plus four (4) option years.

B. The guaranteed minimum will be twenty-five percent (25%) of the estimated award dollar value per contract period. The maximum ceiling will be one hundred and twenty-five percent (125%) of the estimated dollar value per contract period. In the event of emergencies and/or mobilization, the Government reserves the right to unilaterally execute a higher alternate ceiling. This alternate ceiling shall be one hundred and fifty percent (150%) of the estimated dollar value per contract period of this acquisition. The maximum ceilings are not negotiable.

8. **OPTIONS**

A. There are four (4) one-year options in this solicitation. Acceptance of these options by the successful prime vendor is **mandatory**. The distribution prices for each option year shall be offered as a percentage, increase or decrease, from the base year. The Distribution prices offered on each option year will be calculated with the delivered price proposed for each evaluated item.

B. Prices will be evaluated inclusive of the options, i.e. the totals for all prices for the base year plus option years will be added together to arrive at the total aggregate dollar value. This dollar value will be used as the basis for evaluating offers.

C. Offerors are reminded, that at any point during the base year, or one of the option years that the contract reaches its maximum monetary ceiling of 125% (150% in case of surge/mobilization), the Government reserves the right to exercise the option less than one (1) year after the award date.

9. **NON-COMPETITION**

The offeror warrants that he will not actively promote, encourage, or market any of the customers, on this acquisition, away from a resultant DSCP contract and onto a contract of any other Government agency or commercial entity.

10. **FRESH FRUIT and VEGETABLES**

Customers supported under this contract are expected to receive their Fresh Fruits and Vegetables from the DSO Denver, CO. under a separate award.

11. **MARKET READY ITEMS**

A. Fresh bread items (primarily sliced bread and rolls) and fresh dairy items (fluid milk, cultured products) are centrally procured by DSCP and are not expected to be ordered from the Prime Vendor.

B. If, after contract award, the ordering activities have a need for Prime Vendor deliveries of some or all of these items, the Contracting Officer and Prime Vendor will determine the availability and establish a mutually agreed upon start-up period and negotiate a distribution price for this service with the Prime Vendor.

12. RELATED NON-FOOD ITEMS AND MANDATORY NON-FOOD ITEMS

A. The Government reserves the right to incorporate into resultant contract any consumable or disposable products (related non-food items) associated with the preparation or serving of food. This includes, but is not limited to, plastic, foam, paper goods and cleaning supplies.

B. The offeror must provide a distribution price for this category.

C. DSCP is currently working to add Non-Food (Relating to Foodservice) items to its' Prime Vendor contracts. Upon this implementation certain items will require sourcing via NIB/NISH centers/stores. The exact items will be furnished when the program is finalized.

13. MANDATORY ITEMS - FOOD

A. The items listed below, in stated package or any commercial packaging equivalent must be purchased from either the National Industries for the Blind (NIB) or the National Industry for the Severely Handicapped (NISH). The mandatory sources now have the ability to package these items in a wide variety of sizes. The Prime Vendor must contact the mandatory source of supply to ascertain if the specific size needed by the customer is available from the mandatory source, prior to obtaining these items from another source.

C. If a Prime Vendor is advised that any of the above items are not available from the supplier, the Contracting Officer must be immediately notified.

14. REBATES / DISCOUNTS

A. The following instructions for rebates and discounts refer to those, which are in addition to DSCP's NAPA (National Allowance Pricing Agreement) and Food Show Discounts. As discussed in the following sections, all NAPA's and Food Show Rebates must be given in the form of a deviated price.

B. Rebates and discounts are to be returned to DSCP when they are directly attributable to sales resulting from orders exclusively submitted by DSCP or its customers. Additionally, any rebates and discounts offered to any commercial customer or other Governmental organization shall be returned to DSCP or its customers in the form of an up-front price reduction (resulting in a lower delivered invoice price to the customer/reduced STORES price).

C. The Prime Vendor shall be as aggressive as possible in pursuing all rebates, including mail in coupons and discounts for the customers supported under this contract. Notwithstanding the requirements included herein, the unit price offered by the offeror shall be less than equal to the unit prices charged by the offeror to its most favored commercial or government customer for similar quantities under comparable terms and conditions.

D. A rebate report shall be provided to the Contracting Officer on a monthly basis. This Rebate report shall be a break out of all rebates by manufacturer, then sorted by customer/dining facility. The final procedures relative to managing and returning lump sum rebates will be based on the final proposal and confirmed after award. The Government, however, reserves the right to audit applicable records to ensure proper administration of the rebate program and ensure that moneys due to the Government have been properly returned in accordance with the offer.

15. NATIONAL ALLOWANCE PRICING AGREEMENT (NAPA)

A. Definitions:

1. Agreement Holder - the supplier or manufacturer that has agreed to offer discounts to DSCP on product ordered under DSCP Prime Vendor contracts.

2. National Allowance Pricing - the program implemented by the Defense Supply Center Philadelphia (DSCP) to maximize the leverage of DSCP's unified buying power and reduce the overall delivered price under Prime Vendor Contracts to the customers of DSCP.

3. National Allowance Pricing Agreements (NAPAs) - agreements between DSCP and suppliers/manufacturers, which identify product category, allowances. These allowances or discounts apply only to the delivered/invoice price of the product. The NAPA does not affect the Prime Vendor's distribution price or fee in any way. All applicable allowances are deducted prior to the Prime Vendor's distribution fee.

B. DSCP has implemented a NAPA Program as part of the Subsistence Prime Vendor program. Under the NAPA Program, DSCP will enter into agreements with suppliers/manufacturers.

C. Under the NAPA Program, Agreement Holders will:

Authorize and consent to allow the contractor to distribute its products to ordering activities under the Prime Vendor Program.

1. Offer discounts on the delivered price of the product ordered under Prime Vendor contracts, in the form of deviated allowances, whereby the price to the customer includes the discount. The deviated price is the price that will be submitted via the 832-catalog transaction.

D. NAPA's neither obligate the Prime Vendor to carry, or the ordering activity to purchase, any of the agreement holders products, however NAPA terms will apply to any order placed by a customer for products covered by a NAPA, in which case the invoice price must reflect the NAPA.

E. If a contractor has a pricing agreement/arrangement with more favorable terms and/or pricing structure, then the contractor is required to pass on these savings to the customer.

F. Under a contract resulting from this solicitation:

1. Within five (5) working days from notification of award, the awardee will contact Marty Lieb, Program Manager, NAPA Team, (215) 737-4210. The NAPA Team will provide general instructions and a password to access the allowances on the NAPA website.

2. The Prime Vendor agrees to bill the invoice price to the Government as specified by the NAPA allowance and initiates a bill-back to the agreement holder, if any activity orders any product covered by a NAPA. The agreement holder will reimburse allowances to the Prime Vendor within a time period mutually agreeable to by the Prime Vendor and the agreement holder.

3. Any disputes involving the NAPA between the Prime Vendor and the agreement holder will be resolved between them according to their own commercial practices. However, DSCP will attempt to facilitate any such disputes.

G. The NAPA Program is for the exclusive use of DSCP customers under the resultant contract.

16. FOOD SHOWS

A. DSCP actively participates in vendor Food Shows for the purpose of obtaining food show "allowances" for the customers supported by this acquisition. These allowances are negotiated by DSCP with each exhibitor at the Food Show, whether it is a broker representing several firms, the distributor representing a firm, or the manufacturer directly. In addition, other procedures in accordance with a vendor's normal commercial practice may be used to negotiate the allowances or savings.

B. The Prime Vendor is required to advise the Contracting Officer and/or Account Manager of all Food Shows that are conducted throughout the course of the contract. This includes Annual Shows, as well as Regional and/or Mini Food Shows. The Government reserves the right to participate.

C. No later than two (2) weeks prior to the food show, the Prime Vendor shall furnish the Contracting Officer and/or Account Manager with the following information:

1. List of brokers/manufacturers attending the Food Show.
2. Map showing the locations of booths.
3. Effective period of the allowances.
4. Statement as to whether the allowances are applicable to all orders placed within the effective period, or for only the amount of product booked.
5. Usage report for all customers covered by the contract. This data shall represent the same number of weeks as the effective period of the allowances. The data shall be a consolidation of all customers, and be sorted in booth order sequence. At a minimum the following elements are required:
 - a. Vendor Part Number
 - b. Description of item
 - c. Usage quantity
 - d. Manufacturer/Brand
 - e. Booth Number of exhibitor representing the product.

D. At the end of the Food Show allowance period, the vendor shall submit to the Account Manager a Food Show savings report by customer. This shall be completed within 3 weeks of the ending of the allowance period.

E. Food Show Allowances must be passed on to the customers directly as a deviated price. Accordingly, when the applicable items are ordered, the price must reflect the discount if ordered during the specified time frame. The deviated price is the price that is to be submitted via the 832-catalog transaction.

17. CUSTOMER SERVICE

A. The Prime Vendor shall treat each and every customer covered under this contract as one of its best customers. Therefore, any treatment and/or customer service policy given to other essential accounts shall also be given to the customers covered under this contract.

At a minimum, quarterly visits to the customers under this contract is required to show new items, product preparation, provide nutritional information and address any other concerns that the customer may have.

B. The Prime Vendor is required to have a representative attend monthly Menu Board Meetings at the customer locations. This representative **MUST** have the authority to make binding decisions on behalf of the Prime Vendor on any concern, which may occur at these meetings.

18. CUSTOMER SUPPORT

A. The Prime Vendor shall provide at least one (1) full time (dedicated) customer service representative to maintain continuous contact with the ordering activities. The name of the representative and the phone number, beeper number, e-mail address, or any other representative and the phone number, beeper number, e-mail address, or any other method of communicating with the representative, shall be furnished at time of submission of offer and to the customers after award. The customers for this region request customer service representative visits on a bi-weekly basis (at a minimum).

B. Since many of our customers only have access to the government phone network, offerors are required to have a toll free telephone and a toll free FAX number to accommodate all customers outside of the local calling area.

19. NEW ITEMS

A. If a customer desires to order an item that is not part of the contractor's inventory, and movement is 20 cases or more per month, the Prime Vendor will be allowed a total of thirty

(30) days to source items. These items should then become a permanent part of the Prime Vendor's inventory if it appears that these items will be ordered on a regular basis.

B. The successful awardee shall assume the responsibility of introducing new food items to the customers, as well as to show cost effective alternatives to their current choices. Your company would still be required to perform your normal supplier selection process to include your analysis/comments/recommendations of the new products prior to the product sampling/taste testing.

20. ADDITIONAL CUSTOMERS

A. Additional DoD and non-DoD customers in the solicited areas may be added to the Prime Vendor contract based on mutually agreed upon implementation plan, at no additional cost to the Government. If a customer is on the border of one of the surrounding states, in an area where the Prime Vendor in that area does not normally travel, the successful offeror of this contract may be asked to service those customers.

B. Additional customers are limited to those that receive Federal funding.

Accordingly, all items supplied under the contract awarded as a result of this solicitation must comply with the Berry Amendment (10 U.S.C. C. During the year, the Government may issue individual domestic non-availability determinations when warranted. The Contracting Officer will forward a notice to the Prime Vendor as the determination (s) is (are) made

2. ORDERING SYSTEM

A. The majority of customers listed within this zone are currently using Subsistence Total Order and Receipt Electronic Systems (STORES). However, there are some customers in which the contractor must provide their commercial electronic ordering system.

Also, future customers may be added that do not have the capability to be under the STORES environment. The offeror may be required to provide alternate methods for these customers to place orders. Contractors will be required to provide their commercial electronic ordering system to the following customers:

B. Subsistence Total Order and Receipt Electronic System (STORES)

1. STORES is the Government's ordering system which is capable of accepting orders from any of the Services', i.e. Army, Air Force, Navy, Marines, individual ordering systems and translating the orders into an Electronic Data Interchange (EDI) format. In addition, this information is passed to DSCP for the purposes of contractor payment and customer billing.

2. Customers will be able to order all of their food and beverage requirements through STORES.

3. The Prime Vendor shall be required to interface with STORES. In order to interface with STORES, the offeror **must** be able to support the following EDI transaction sets:

832	Catalog (Outbound - Vendor to DSCP)
850	Purchase Order
861	Receipt
997	Functional Acknowledgment
810	Electronic Invoice

The offeror may be required to transmit 832, 997 and 810 transactions, prior to award and during proposal evaluations, in order to demonstrate its EDI Compatibility.

4. In the event the STORES system or your interface is not operational, you must provide alternate ways a customer may order (e.g. FAX, Phone, Pick-up orders, etc.)

5. A complete description of these transaction sets is included in the "EDI Implementation Guidelines" attached to this solicitation.

6. The vendor **MUST** have access to the Internet and be able to send and receive electronic mail (email).

7. Unit prices and extended prices must be formatted two (2) places to the right of the decimal point. STORES WILL NOT ACCOMMODATE POSITIONS 3 ABOVE AND BEYOND THE DECIMAL POINT.

8. Within the 832 transaction, the offeror is required to submit "Item Descriptions" per the Government's format. An example is, "Carrots", would be listed as "Vegetable, Carrots, Crinkle Cut".

3. **ORDER PLACEMENT**

A. Customers shall place their orders to accommodate a "skip day" delivery. An order placed on March 1st would have a required delivery day of March 3rd. Orders may be placed with a longer lead-time; however the minimum lead-time is "skip day".

B. The Prime Vendor shall advise the customer by 12 noon on the skip day of the non-availability of an item. If it appears that the vendor does not expect a stock replenishment in sufficient time to fulfill the requirement, the Prime Vendor should offer the customer a substitute, or advise them of the not in stock position of the item. The customer will make the final decision on the acceptability for any substitution.

B. A substitute item must be of equal or higher technical quality and equal or lower in price.

4. **PRODUCT QUALITY**

A. Acceptance of supplies awarded under this solicitation will be limited to product processed and packed from the latest pack available or the latest seasonal pack during the contract period. All products delivered shall be as fresh as possible and within the manufacturer's established shelf life (i.e. Best if Used by Date, Expiration Date, or other markings). For annual pack items, products will be from the latest seasonal pack available, unless specifically authorized by the customer.

B. Commercial standards should be used to maintain temperatures appropriate for individual items.

C. Level of Product Quality

1. When designating an item as a match for the DoD item in the schedule of items listed in the solicitation, the item must be:

a. Identical in respect to packaging and packing when the DoD unit of issue is not described by weights (e.g. pound or ounce). For example, NSN 8915-00-286-5483, "Fruit Cocktail, Canned" is described as "Light or Heavy Syrup Pack, US Grade A or B, no. 2 1/2 size can, 24 per case". Substituting a No. 10 can and modifying the unit of issue ratio in the STORES ordering system cannot fill the requirement for this item. The same holds true for items described as package (PG), or bag (BG).

b. Identical for portion control items, except that pack size may vary. For example, NSN 8905-00-133-5889 "Beef Braising Steak, Swiss" is described as "frozen, formed, portion-cut, not mechanically tenderized, US Choice Grade or higher, 6 oz each, NAMP 1102 or equivalent, from knuckle, inside round, Eye of Round, or Outside Round, 53 lbs. per box". The requirement for the formed six (6) ounce portion must be identical. However, if the commercial pack size were a 15 lb. box, it would be acceptable by modifying the unit of issue ratio in the STORES ordering system. In respect to the previous examples, the DoD ordering activities require continuity with the DoD unit of issue for proper inventory and accounting within DoD.

c. Equivalent in respect to grade or fabrication.

2. When the STORES cataloging function of matching your part number to a Government National Stock Number (NSN) or Local Stock Number (LSN) is performed, the item must meet or exceed the Government item description, which includes the Unit of Issue. If the item does not meet the Government description, or if there are any new items that the customer requests, then a LSN may be requested.

5. QUALITY PROGRAM

A. Supplier Selection

A supplier selection or certification program shall be used to ensure standardized product quality for each item supplied and/or listed in the stock catalogs, regardless of supplier. The product quality shall equal that described in the pertinent item specification. Product characteristics shall be standardized to the extent that variations in flavor, odor, and texture will be minimized.

B. The contractor shall develop and maintain a quality program for product acquisition, warehousing and distribution to assure the following:

1. Standardized product quality
2. The usage of First-In, First-Out (FIFO) principles;
3. Product shelf life is monitored;
4. Items are free of damage;
5. Correct items and quantities are selected and delivered;
6. Ensure requirements of the Berry Amendment are met;
7. Customer satisfaction is monitored;
8. Product discrepancies and complaints are resolved and corrective action is initiated;
9. Supplier, FDA, or DoD initiated food recalls are promptly reported to customers and DSCP;
10. Compliance with EPA and OSHA requirements;
11. Salvaged items or products shall not be used;
12. Applicable food products delivered originate from a source listed as a Sanitarily Approved Food Establishment for Armed Forces Procurement.
13. HAACP, if applicable

6. **WAREHOUSING AND SANITATION/STORED PRODUCTS PEST MANAGEMENT PROGRAM**

The contractor shall develop and maintain a sanitation program and a stored product pest management program for food and other co-located non-food items. Records of inspection performed by the firm, subcontractor, or recognized industry association shall be maintained and made available to the Government at the Contracting Officer's request. Any findings by the firm or its agent documenting a critical sanitation deficiency shall be reported immediately to the Contracting Officer with an attached report of corrective action. Accepted industry standards for the above programs include, but are not limited to, the Code of Federal Regulations, Title 21, part 110, Food Manufacturing Practices, the Federal Insecticide, Fungicide and Rodenticide Act (as amended), the Food, Drug, and Cosmetic Act of 1938, and pertinent state and local laws and regulations.

7. **PRODUCT SANITARILY APPROVED SOURCE REQUIREMENTS**

A. Applicable food products, e.g. poultry, dairy and seafood items delivered to customers listed in this solicitation, as well as any customer added to the Prime Vendor Program, shall originate either from an establishment listed in the "*Directory of Sanitarily Approved Food Establishments For Armed Forces Procurements*", or one which has been inspected under the guidance of the United States Department of Commerce (USDC) or the United States Department of Agriculture (USDA).

B. The following is the Internet Link to VETCOM'S Directory of Sanitarily Approved Food Establishments.

<http://domino1.hcssa.amedd.army.mil/vetcom.nsf>

8. **CONTRACTOR PRODUCT DESCRIPTIONS**

A. At the time of the initial submission of the proposal, the offeror shall provide a set of product technical descriptions [specifications], for the "Market Basket" items identified in this solicitation if product being priced is not an "identical match" (see page #'s 103 - 109).

B. The technical description must contain sufficient detail to determine the product's salient characteristics for comparison to that solicited in the schedule of items.

9. **PRIME VENDOR QUALITY SYSTEMS MANAGEMENT VISITS**

The Subsistence Prime Vendor Technical and Business Support Branch will conduct Prime Vendor Quality System Management Visits (PVQSMV's) to review the contractor's methods used to meet the terms of the contract and to verify that those terms are being met. PVQSMV's may include on-

site visits to subcontractors and/or product suppliers. The contractor shall be responsible for coordinating these on-site visits by DSCP Personnel with their Subcontractors/Suppliers..

Please Note: Colorado / Wyoming Zone customers require Customer Service Representative visitations on a monthly basis (as a minimum).

10. DSCP NATIONAL FOOD AUDITS

Basic Audits:

The National Food Audit Program functions as a Service and Quality Assurance check for our DOD customers to ensure the War fighters are receiving products of an optimum quality level. The audit objectives focus on the following to ensure:

- (1) Prime Vendors adherence to contract requirements.
- (2) The quality level of the materials supplied is at a satisfactory quality level and uniform throughout the DSCP-H Prime Vendor Regions.
- (3) There is no product misrepresentation or substitution.

The Audit objectives are accomplished utilizing the expertise of the USDA AMS Livestock and Seed Division personnel (Meat Graders), USDC National Marine Fisheries Service, USDA and DSCP-HFS Quality Assurance personnel, which form the National Food Audit Product Review Team.

The National Food Audit technical product review is intended to provide, a partnership between the customer, prime vendor and DSCP-H, a platform for continuous quality improvement through a detailed review of selected core items. An informative discussion of the observed items' physical characteristics and deviations from or compliance with established quality requirements is provided during the product review. This technical discussion makes possible an understanding of the customers need for certain quality requirements so that systems supporting the manufacturing and distribution of the item can be tailored to meet these requirements. This approach makes it a win-win for the customer, prime vendor and DSCP-H.

For each Prime Vendor it is expected that an audit would be conducted once per contract year. This includes the base year of the contract, plus any and all option-years in which the government's option is exercised. The Audits are conducted in a seminar setting with participation from you and your suppliers. The average cost of a Meat Audit is approximately \$6000.00, the average cost of a seafood audit is expected to be \$3000.00. As a Prime Vendor you will be expected to provide samples of the government's choice up to a dollar value ceiling of \$6000.00 for Meat and Poultry Products, and \$3000.00 for Seafood Products and Fruits & Vegetables. Any expense for the sampled product above these ceilings may be billed to the Government under your contract.

Audit Results:

Prime Vendors will be given a detailed report on each product reviewed. It will be the Prime Vendor's responsibility to take immediate action to correct any deficiency uncovered during the audit.

Follow-up Audits:

Follow up audits may be scheduled within a one-year period of the initial audit, based on the recommendation of the evaluators of the Basic Audit. If a follow up is required due to observation and/or outcome of the initial audit all samples are to be at the expense of the Prime Vendor.

Non-routine follow up audits may be scheduled if several items do not meet the government's requirements as presented in the catalog descriptions.

PROGRAM EXPANSION

The government plans to expand this program into all categories of subsistence items. Samples will be required as above within negotiated limits.

11. JUICE AND DRINK DISPENSERS AND SOFT SERVE/YOGURT MACHINES

A. When requested, the contractor shall furnish beverage dispensing machines, beverage products, and soft serve/yogurt machines as specified herein. All management, labor, transportation, and supplies required to repair and maintain the contractor's equipment shall be the sole responsibility of the contractor.

B. The contractor shall furnish mechanically refrigerated dispensing machines and heads suitable for use with the contractor's bag-in-the-box juices, drinks, coffee and soft serve/yogurt machines. A sufficient number of machines and dispensing heads shall be installed in the customer's facility to accommodate the specific needs of each ordering activity.

C. The contractor will provide a technically qualified service representative who will perform monthly maintenance and quality control inspections on each dispensing system. If more frequent maintenance is deemed necessary, the Prime Vendor must provide this additional service at no additional cost.

D. Any equipment or material furnished by the Prime Vendor shall remain the property of the vendor and must be returned to the vendor at the conclusion of the contract in the same condition in which it was received.

12. CEREAL DISPENSERS

When requested, the contractor shall furnish cereal dispensers suitable for the type of cereal requested by the customer. Maintenance or replacement shall be in accordance with normal commercial practice.

PACKAGING AND MARKING

1. PACKAGING, PACKING, AND LABELING

A. All packaging and packing shall be in accordance with good commercial practice. Labeling shall be in accordance with commercial labeling complying with the Federal Food, Drug and Cosmetic Act and regulation promulgated thereunder. Shipping containers shall be in compliance with the National Motor Freight Classification and Uniform Freight Classification Code.

B. Semi-perishable items shall be snugly packed in shipping containers that fully comply with the National Motor Freight Classification and Uniform Freight Classification Code, as applicable.

C. All meats, poultry, and seafood will be vacuum packed when practicable. In all instances the packaging will protect the product from freezer burn and contamination.

D. All fresh poultry items will be packed in ice packed cartons or gas-flush cartons.

E. All fresh seafood items will be in ice packed cartons.

F. Frozen product must be processed and packed to allow removal of the individual units from the container without damage to that or other units. The intent is to be able to remove only that amount of product required for current needs, without the necessity of defrosting.

2. MARKINGS

A. To ensure that the carrier and the receiving activity properly handle and store items, standard commercial precautionary markings such as "KEEP FROZEN", "KEEP REFRIGERATED", etc. shall be used on all cases when appropriate.

B. To the maximum extent possible, nutritional and ingredient labels shall be placed on the individual package.

C. All food and beverage products shall be identified with readable dates (open code dates), or coded dates, as determined by the type of product delivered. For semi-perishable, shelf stable items, open dating is preferred, but code dating is acceptable. Contractors that do not use open dating shall provide a product code number key to the Account Manager and each customer facility. Items other than semi-perishable, shelf stable products must have readable, open code dates clearly showing the use by date, date of production, date of processing/pasteurization, sell by date, Best if Used by Date, or similar markings.

INSPECTION AND ACCEPTANCE

1. INSPECTION AND ACCEPTANCE

A. Inspection and Acceptance of products will be performed at destination. The inspection is normally limited to identity, count and condition; however, this may be expanded if deemed necessary by either the military inspector, or the dining facility manager of food service.

B. All deliveries are subject to military inspection. In addition, the delivery vehicles will be inspected for cleanliness and condition.

C. The authorized receiving official at each delivery point is responsible for inspecting and accepting products as they are delivered. The invoice/delivery ticket shall not be signed prior to the inspection of each product, unless agreed upon by the receiving activity (customer). All overages/shortages/returns are to be noted on the delivery ticket by receiving official and truck driver. A signature on the delivery ticket/invoice denotes acceptance of the product. No invoice may be submitted for payment until acceptance is verified.

2. WARRANTIES

The supplies furnished under the resultant contract shall be covered by the most favorable commercial warranties the contractor gives to any customer for such supplies and the rights and remedies provided therein are in addition to and do not limit any rights afforded to the Government by Clause 52.212-4 "Contract Terms and Conditions-Commercial Items" contained in the solicitation.

3. ACCEPTANCE REQUIREMENTS FOR FROZEN ITEMS

A. In order for frozen items to be accepted by the receiving activity, the following criteria must be observed:

1. Packages must be solid, not soft, upon arrival.
2. Container and wrapping must be intact and in a solid condition.
3. Packages must be free of drip and show no evidence of thawing and re-freezing (i.e. watermarks on boxes, off odor) or dehydration.
4. Cello wrapped packages will not be discolored or show other signs of freezer burn.

4. REJECTION PROCEDURES

A. If product is determined to be either defective, damaged, or compromised in any other manner, it may be rejected by the receiving official.

B. When product is found to be non-conforming or damaged, or otherwise suspect, the receiving official shall notify the accountable food service officer. The Food Service Officer shall inspect and determine the course of action to be taken with the product in question. If present, the contractor representative may be consulted. The final decision is to be made by the Food Service Officer and/or their representative.

C. In the event an item is rejected, delivery ticket/invoice shall be annotated as to the item(s) rejected. These items shall then be deducted from the delivery ticket/invoice. The invoice total must be adjusted to reflect the correct dollar value of the shipment. Replacements will be authorized based on the customer's needs. To the greatest extent possible, on an as-needed, emergency basis, same day re-delivery of items that were previously rejected shall be made, so that their food service requirements do not go unfulfilled for that day. The re-delivered items will be redelivered under a separate invoice utilizing the same call number, clin number, and purchase order number for the discrepant line. These re-deliveries will not constitute an emergency requirement and therefore will have no additional charges.

D. In the event that a product is rejected after initial delivery is made, the prime vendor will pick up the rejected product. Credit due to the ordering activity, as a result of the rejected product being returned, will be handled through a receipts adjustment process in STORES. If the vendor has already been paid for the product, a claim will be issued through DSCP's financial system. In all cases one (1) copy of the credit memo is to be given to the customer and one (1) copy of the credit memo, along with the original invoice is to be sent to the DSCP Account Manager.

1. If a customer requires a one-to-one replacement, no additional paper work is necessary. The vendor delivery ticket/invoice will show that product is a replacement for rejected item. The invoice shall reference the call number, Clin number, and Purchase Order Number of the originally ordered product. In addition, a copy of the credit memo from returned product is to be attached to the invoice.

However, failure to promptly inspect or accept supplies shall not relieve the contractor from responsibility, nor impose liability on any of the customers, for non-conforming supplies.

F. Supplies transported in vehicles, which are not sanitary, or which are not equipped to maintain prescribed temperatures, may be rejected without further inspection.

A. Order fill rates shall be calculated on an on-time, per order basis and tracked for monthly submission to the Contracting Officer/Account Manager. The awardee shall maintain a fill rate of no less than 98.5% monthly. The fill rate shall be calculated as follows and shall not include mispicks, damaged cases, etc.:

$$\frac{\text{Cases accepted}}{\text{Cases ordered}} \times 100 = \text{fill rate \%}$$

B. The fill rate shall be calculated with and without substitutions.

Note:

Substitutions must be approved by authorized customer personnel prior to shipment.

5. **HOLIDAYS**

A. All orders are to be delivered on the specified delivery date, except for Federal holidays as outlined below. When a scheduled delivery day falls on one of these days, or one designated by your firm, delivery should occur on the next business day, unless otherwise agreed to by the customer.

New Year's Day	Labor Day
Martin Luther King, Jr's Birthday	Columbus Day
President's Day	Veteran's Day
Memorial Day	Thanksgiving Day
Independence Day	Christmas Day

Note: Saturday holidays are celebrated on the preceding Friday; Sunday holidays are celebrated on the following Monday.

B. Holidays celebrated by your firm, other than those specified above, must be listed below. Also, specify your policy for celebrating holidays that fall on the weekend.

6. **SURGE/MOBILIZATION**

A. Readiness Plans - Surge/Mobilization

1. The capability to handle large increases in quantities for short periods of time with very little lead-time may be required at various times throughout the term of the contract. Services may experience unscheduled arrival of troops, with only a few hours notice, as part of

normal operations, where the order requirements could more than double from their normal usage on a given day's notice. The timing of these types of surges will be impossible to anticipate. The absolute ceiling for these surges would be 150% of the estimated dollar value. Pricing constraints for items furnished in this fashion shall be the same as those for routine, non-surge orders.

2. Capability to handle full-scale military mobilization or national emergency wherein consumption could easily double or triple at any site for a protracted period must also be provided for: offeror must develop a readiness plan outlining how they would meet this increased workload by, for example using additional suppliers, subcontractors, etc. As with surge support, pricing constraints for items, furnished in this fashion shall be the same as those for routine, non-mobilization orders.

3. The Government reserves the right to test the Prime Vendor's Readiness Plan.

4. When units deploy for training exercises outside their zone, their current Prime Vendor will be given the opportunity to supply the unit's requirements. If the current vendor cannot perform this function at no additional cost, or the Vendor does not wish to accept the mission, the requirements will be turned over to the Prime Vendor within that deployment zone.

7. **EMERGENCY ORDERS**

The contractor shall provide a maximum of two emergency orders (excluding mobilization actions) per month, per installation, at no additional charge. All emergency orders for supplies must be same day service. Expeditious fulfillment of the emergency requirement is imperative. The Prime Vendor is responsible for providing the ordering facilities the name of the contractor representative responsible for notification of receipt and handling of such emergency service and their toll free phone number, Fax number, email and/or pager number.

8. **AUTHORIZED RETURNS**

A. The contractor shall accept returns under the following conditions:

1. Products shipped in error
2. Products damaged in shipment
3. Products with concealed or latent damage
4. Products that are recalled
5. Products that do not meet shelf life requirements
6. Products that do not meet the minimum quality requirements as defined for the items listed in the Schedule
7. Products delivered in unsanitary delivery vehicles
8. Products delivered that fail to meet the minimum / maximum specified temperature
9. Quantity excess as a result of order input error and/or Purchase Ratio Factor error

B. Any other condition not specified above that is deemed to be valid reasons for return.

9. **SHORT SHIPMENTS / SHIPPING ERRORS**

A. Short shipment will be noted by the receiving official on the delivery ticket/invoices accompanying the shipment.

B. Any product delivered in error by the distributor must be picked up on the next delivery day after notification by the ordering facility.

CONTRACT ADMINISTRATION DATA

1. CONTRACTING AUTHORITY

- A. The DSCP Contracting Officer is the only person authorized to approve changes, or modify any requirement of the contract.
- B. Requests for information on matters related to this contract, such as an explanation of terms or contract interpretation, shall be submitted to the DSCP Contracting Officer.

2. INVOICING

A. Each delivery will be accompanied by the contractor's delivery ticket/invoice. Three (3) copies (an original plus two) shall accompany the shipment. The customer shall sign all copies of the invoice/delivery ticket, keep one (1) copy and return Original copy to the vendor. **Any changes must be made on the face of the invoice; attachments are not acceptable.**

B. The vendor shall submit two (2) signed copies of the invoice to the Defense Finance and Accounting Service (DFAS) Columbus Center, for payment. At least one (1) of the invoices must be an ORIGINAL, WITH ORIGINAL SIGNATURE. Each invoice shall contain sufficient data for billing purposes. This includes:

- 1. Contract Number
- 2. Call Number (also referred to as Delivery Order Number and/or Contract Order Number)
- 3. Purchase Order Number
- 4. Contract Line Items listed in numerical sequence (also referred to as CLIN order)
- 5. Item Nomenclature
- 6. Quantity purchased per item in DSCP's Unit of Issue
- 7. Clearly identified changes and annotations on all copies
- 8. Total dollar value of invoice recalculated, if applicable.

C. It is ***strongly preferred*** that there be only (1) invoice per customer facility per delivery. Vendors are discouraged from submitting separate invoices for dry, chill and freeze products. However, if this is not possible, then all invoices must be clearly annotated that they are part of a group, e.g. 1 of 3, 2 of 3, etc. In addition, all invoices groups must be sent to DFAS Columbus together.

D. For catch weight items, standard rounding methods must be observed i.e. <5, rounded down; ≥ 5, rounded up. All weights must be rounded to whole pounds using standard rounding methods.

E. ADD-ON ITEMS BY PRIME VENDOR CONTRACTORS –

When a prime vendor customer adds an item to an existing order (e.g. 9999 clin), the Prime Vendor contractor should add these items to the end of the original invoice. An “add-on” is an item or items ordered after the original electronic order has already been released and must be placed through other means, e.g. by telephone, fax, etc., but will be delivered along with the original order. When add-ons are invoiced separately in lieu of the invoice with the original order, it greatly complicates the payment process. A clean invoice, i.e. an invoice that totally matches what was delivered, expedites the payment process considerably. Therefore, *we strongly encourage* our Prime Vendors to invoice as above. Compliance with the above will help us help you receive your payments in a timely manner.

3. PAYMENTS

A. DFAS Columbus Center is the payment office for this acquisition. The mailing address is:

Defense Finance and Accounting Service, Columbus Center
Attn: DFAS-CO-LACBB
P.O. Box 182317
Columbus, Ohio 3218-6260

B. Payment of delivery orders will be made in accordance with the terms and conditions of Paragraph (i) of **Clause 52.212-4 “Contract Terms and Conditions - Commercial Items”**, appearing in the section of this solicitation entitled “Contract Clauses”.

C. Payment is currently being made in approximately 7 days after the receipt of a proper invoice, however, it is still subject to the terms and conditions of the Prompt Payment Act (31 U.S.C. 3903).

4. ADMINISTRATION

A. Administration of the contract will be performed by the DSCP Prime Vendor Office

B. Administration of the individual delivery order will be performed by a designated representative at the ordering activity. This includes approving product substitutions and delivery changes.

(a) Standard Industrial Classification (SIC) Code and Small Business Size Standard.

The SIC code and small business size standard for this acquisition appear in Block 10 of the solicitation cover sheet (SF 1449). (b) Submission of Offers.

Submit signed and dated offers to the office specified in this solicitation at or before the exact time specified in this solicitation. Offers may be submitted on the SF 1449, letterhead stationery, or as otherwise specified in the solicitation. As a minimum, offers must show--

- (1) The solicitation number;
- (2) The time specified in the solicitation for receipt of offers;
- (3) The name, address, and telephone number of the offeror;

- (5) Terms of any express warranty;
- (6) Price and any discount terms;
- (7) "Remit to" address, if different than mailing address;
- (8) A completed copy of the representations and certifications at FAR 52.212-3;
- (9) Acknowledgment of Solicitation Amendments;
- (10) Past performance information, when included as an evaluation factor, to include recent and relevant contracts for the same or similar items and other references (including contract numbers, points of contact with telephone numbers and other relevant information); and
- (11) If the offer is not submitted on the SF 1449, include a statement specifying the extent of agreement with all terms, conditions, and provisions included in the solicitation. Offers that fail to furnish required representations or information, or reject the terms and conditions of the solicitation may be excluded from consideration.

(c) Period for Acceptance of Offers.

The offeror agrees to hold the prices in its offer firm for 30 calendar days from the date specified for receipt of offers, unless another time period is specified in an addendum to the solicitation.

(d) Product Samples.

When required by the solicitation, product samples shall be submitted at or prior to the time specified for receipt of offers. Unless otherwise specified in this solicitation, these samples shall be submitted at no expense to the Government, and returned at the sender's request and expense, unless they are destroyed during preaward testing.

(e) Multiple Offers.

Offerors are encouraged to submit multiple offers presenting alternative terms and conditions or commercial items for satisfying the requirements of this solicitation. Each offer submitted will be evaluated separately.

(f) Late Submissions, Modifications, Revisions, and Withdrawals of Offers.

(1) Offerors are responsible for submitting offers, and any modifications, revisions, or withdrawals, so as to reach the Government office designated in the solicitation by the time specified in the solicitation. If no time is specified in the solicitation, the time for receipt is 4:30 p.m., local time, for the designated Government office on the date that offers or revisions are due.

(2)(i) Any offer, modification, revision, or withdrawal of an offer received at the Government office designated in the solicitation after the exact time specified for receipt of offers is "late" and will not be considered unless it is received before award is made, the Contracting Officer determines that accepting the late offer would not unduly delay the acquisition; and—

(A) If it was transmitted through an electronic commerce method authorized by the solicitation, it was received at the initial point of entry to the Government infrastructure not later than 5:00 p.m. one working day prior to the date specified for receipt of offers; or

(B) There is acceptable evidence to establish that it was received at the Government installation designated for receipt of offers and was under the Government's control prior to the time set for receipt of offers; or

(C) If this solicitation is a request for proposals, it was the only proposal received.

(ii) However, a late modification of an otherwise successful offer, that makes its terms more favorable to the Government, will be considered at any time it is received and may be accepted.

(3) Acceptable evidence to establish the time of receipt at the Government installation includes the time/date stamp of that installation on the offer wrapper, other documentary evidence of receipt maintained by the installation, or oral testimony or statements of Government personnel.

(4) If an emergency or unanticipated event interrupts normal Government processes so that offers cannot be received at the Government office designated for receipt of offers by the exact time specified in the solicitation, and urgent Government requirements preclude amendment of the solicitation or other notice of an extension of the closing date, the time specified for receipt of offers will be deemed to be extended to the same time of day specified in the solicitation on the first work day on which normal Government processes resume.

(5) Offers may be withdrawn by written notice received at any time before the exact time set for receipt of offers. Oral offers in response to oral solicitations may be withdrawn orally. If the solicitation authorizes facsimile offers, offers may be withdrawn via facsimile received at any time before the exact time set for receipt of offers, subject to the conditions specified in the solicitation concerning facsimile offers. An offer may be withdrawn in person by an offeror or its authorized representative if, before the exact time set for receipt of offers, the identity of the person requesting withdrawal is established and the person signs a receipt for the offer.

(g) Contract Award (not applicable to Invitation for Bids).

The Government intends to evaluate offers and award a contract without discussions with offerors. Therefore, the offeror's initial offer should contain the offeror's best terms from a price and technical standpoint. However, the Government reserves the right to conduct discussions if later determined by the Contracting Officer to be necessary. The Government may reject any or all offers if such action is in the public interest; accept other than the lowest offer; and waive informalities and minor irregularities in offers received.

(h) Multiple Awards.

The Government may accept any item or group of items of an offer, unless the offeror qualifies the offer by specific limitations. Unless otherwise provided in the Schedule, offers may not be submitted for quantities less than those specified. **ADDENDUM TO 52.212-1 INSTRUCTIONS TO OFFERORS-

5. Paragraph (t), *Price Changes*, is added as follows:

(t) *Price Changes*.

(1) Definitions.

- (i) **Unit Price** - The total price charged to DSCP per unit for a product delivered to the Government consists of two (2) components: delivered price and distribution price. This price shall not extend more than two (2) places past the decimal point.
- (ii) **Delivered Price** - The actual last invoice price of the product paid to the manufacturer/supplier, delivered to the Prime Vendor's facility.
- (iii) **Distribution Price** - The firm fixed price, offered as a dollar amount, which represents all the elements of the contract price other than the delivered price. This distribution price will consist of the prime vendor's projected general and administrative overhead, profit, packaging costs, transportation costs and any other expenses.

(2) Effective Period of Prices. Pricing will be at the time of order. These prices will be fixed until delivery, provided that the delivery is requested within the time frame of six days starting the day after the order is placed. If delivery is not requested until after this time frame, pricing will be as of the delivery date. The offeror warrants that the current delivered prices do not include any allowance for possible future increases. The vendor may not submit its invoices to DFAS Columbus for payment until notified by the customer that all product has been received in good condition and in the quantities stated on the invoice. This notification must be in writing.

(3) The offeror also warrants that its unit prices are equal to or lower than its most favored customer for similar quantities under comparable terms and conditions. (Should price verifications reveal any instances of overpricing, the contractor further agrees to reimburse the Government for that amount.)

(4) For the purpose of unit price adjustment, the offeror shall indicate its distribution price per unit of issue for each item category of items, which shall be expressed as a dollar figure. The distribution price may differ per category; however, each category and the associated items which fall under it, must have the same unit of issue. (The distribution price must always be equal to the unit price less the delivered price.) The distribution price, as proposed in the offer and accepted by the Government, shall remain fixed throughout the term of the contract.

(5) The delivered price for each item is influenced by commercial market forces, such as supply and demand, and competition among suppliers, and may, therefore, fluctuate. Vendors may change prices in their STORES Vendor Item Catalog weekly. The submissions are to be made by Friday, to be in effect the following Sunday. All price changes must be submitted to DSCP via the 832 EDI Transaction Set. This transmission must be received by Friday, 1:30 PM Philadelphia time. See Attachment 1 :EDI Implementation Guidelines” for more information of the various EDI transaction sets required under this contract.

(6) Upon request, the Prime Vendor shall furnish to the Government data, as required by the Contracting Officer, to support price changes and to confirm that the contract unit prices under this contract are fair and reasonable and are based on the catalog or market prices which it pays to its suppliers. This supporting documentation shall be in the form of delivered price invoices and unit prices charged to the Prime Vendor’s commercial business as well as suppliers’ quotations, invoices, catalogs, published price lists and any other information as required by the Contracting Officer.

(7) The Government shall perform price verification analyses from time to time throughout the term of the contract. When requested, the contractor shall provide to the Contracting Officer delivered price invoices. The Prime Vendor shall keep all delivered price invoices for a period of at least one (1) year after issuance of the applicable delivery order. As a minimum, the Contracting Officer shall review the invoice in conjunction with the distribution price to verify the accuracy of the delivery order unit price (i.e. the unit price in effect in the contractor’s electronic catalog at the time of delivery order placement).

(8) The delivered price plus distribution price should equal the delivery order unit price. The contractor shall promptly refund any overcharges discovered during this process. Overcharges shall also result in more frequent price verification analyses.

(9) The Prime Vendor shall obtain product from suppliers who can provide the best value to the Government in terms of price, delivery, and quality. Whenever appropriate, the Prime Vendor shall take advantage of “reduced price specials” and “sales” offered by suppliers, as well as those manufacturers that have a National Allowance Program Agreement (NAPA) with DSCP. A list of NAPA holders is attached to this solicitation.

(10) The requirements of this clause shall also apply to new items added to the Contractor’s electronic catalog after contract award.

NOTE: In conjunction with the above clause, the following should be noted by the contractor: Variable weight items (such as meat and poultry (roasts, turkey, etc.) and lump sum billing can not be receipted in decimals, e. g.4.6 pounds. Contractors must round using Standard Rounding Methods.

(11) Offerors are advised that the Contracting Officer intends to conduct price verification analysis in the following manner:

(i) Periodically, the Price Verification Team may require the contractor to provide copies of specific invoices from suppliers covering up to 100 items that were previously ordered. These invoices will be used to verify that the Government is only being charged the actual product cost plus the negotiated distribution fee.

(ii) The Price Verification Team will request the above documentation in writing and the contractor will have thirty (30) days after the request to furnish the documentation.

(iii) The contractor shall promptly refund or credit any overcharges discovered during this period. The Government reserves all rights and remedies provided by law or under the contract in addition to recovering any overcharges.

(iv) The Government may elect to expand the scope of the price verification analysis if overcharges are discovered. The Government may also elect to reduce the scope of the price verification analysis if no overcharges are discovered.

(v) Unit prices shall be limited to a maximum of two (2) decimal places. For evaluation and award purposes, offers containing a unit price of more than two (2) decimal places shall be rounded off to two (2) decimal places. For administrative purposes, the extended line item and total dollar amounts will be rounded to two (2) decimal places and may not precisely reflect the quantity(ies) times the unit price(s). Payment shall be accomplished on a unit price basis.

Section 4.0 EDI Transaction Sets

4.1 832 Catalog (Vendor to DSCP)

The 832 Catalog uses the standard EDI transaction set for the 832 Price/Sales Catalog. All food ordering sites will receive the 832 Catalog weekly. DSCP prepares and sends the catalog update information on Sunday night. DSCP customers will retrieve the new catalog on the following Monday morning. This 832 transaction set is referred to as the 832 Catalog (DSCP to Customers).

Once the vendor processes catalog updates, the vendor produces the cross reference details. This information is sent to DSCP via the 832 transaction set. This transaction set is referred to as the 832 Catalog (Vendor to DSCP) and is described below.

If communications with the network fail due to a problem which is not corrected by the next scheduled transmission, the party experiencing the problem should evaluate the situation as soon as possible and discuss it with the other party. If a hardware or software problem appears to be of a magnitude to extend for more than three scheduled transmissions, an alternative means of communication may need to be chosen. Such situations will have to be evaluated on an individual basis to determine the proper

corrective action. If it is necessary to start conventional communications again, both parties should reestablish EDI as soon as possible for all subsequent messages.

The DSCP STORES Help Desk or DSCP Account Manager should be promptly contacted with operational concerns related to purchase order transactions.

Section 3.0 Production Procedures

3.1 Outgoing Transmission Schedule

Currently, DSCP customers will only be transmitting outbound 850 purchase orders. Vendors will respond to 850 purchase orders with a 997 functional acknowledgment. Vendors will also send 832 Catalog transaction sets to DSCP. Additional transaction sets may be implemented at a future date. At that time the DSCP EDI coordinator will notify the customer and vendor with the appropriate information. DSCP customers and vendors have access to the network at any time. There is a scheduled batch process at DSCP which begins at 6:00 p.m. EST/EDT each day. Transactions received in Philadelphia, PA after that time will not be processed until the next day. Network overhead should be taken into account; allow 15 to 60 minutes depending on network traffic.

3.2 Verification of Transmission

DSCP customers expect the vendor to send a Functional Acknowledgment upon receiving an order transmission. Most systems can be programmed to send these automatically.

3.3 Problem Recovery During Production

During test mode, transmission problems are generally not recovered. After moving into production mode, delays, omissions, duplicates or any other type of error have to be addressed promptly. In the unlikely event that a delay lasts three days or longer, the DSCP customer will contact the vendor concerning the need to transmit hardcopy orders.

If the Interchange Control Number (ISA13 element) is received more than once, the vendor should not process the duplicate transmission. Although the DSCP standard software has the constraints to prevent sending out duplicate purchase orders, the vendor may still need to consider making a software check for purchase order numbers that may be inadvertently sent more than once.

It is DSCP's intent to successfully deliver data to the network for each vendor on each scheduled day. If the customer is unable to accomplish this by the agreed upon time, the customer will attempt to complete the delivery by no later than the next scheduled transmission. If the customer is reasonably confident of resolving the problem within that 24 hour period, there is no need to contact the receiving party.

Section 2.0 Trading Partner Setup

2.1 Legal

Before DSCP customers can progress from test to production mode with the purchase order transaction, an Electronic Purchase Agreement (EPA) should be ratified. An EPA is a contract between the vendor and DSCP to send and receive documents electronically and in no way interferes with the contract, general purchase agreement or Purchase order terms.

2.2 Phase I - Sample Test File

During the Sample Test Phase generic purchase orders will be sent to vendors to ensure capability of receiving the customer's orders. Similarly, catalog files will be sent from the vendor to DSCP to test catalog transmission. Verbal notification is given to indicate successful sends and receives.

Once a new version of standards has been adopted and documented, DSCP will evaluate the changes to determine the impact to the system. DSCP will progress to a new version of the standards as needs justify. In such instances, the old version of the standards will continue to be supported as long as seems practical and necessary.

When it is necessary to convert to a new version of standards, DSCP will contact all trading partners and will furnish the date when DSCP will be prepared to transmit and receive messages in the new format. Appropriate document layouts will also be furnished. Arrangements can be made through the DSCP EDI Coordinator to conduct a test transmission using the new version of standards.

1.5 Software

All DSCP customers will be using the same EDI software and network to transmit orders. A standard system will be installed at all the participating military bases. Standard procedures have been implemented to ensure the distributed operations can be controlled and maintained from the central site in Philadelphia. The vendor may select any software that supports the transaction sets currently traded and any sets that may be traded in the future.

1.6 Networks

Networks are used as a clearinghouse for all transmissions. Sending and receiving parties may work independently of each other by letting the network handle problems such as storage, communication incompatibilities, scheduling and retransmission.

DSCP pays the network charges for delivery of the customer's documents to the network. The vendor will pay the charges for delivery of the customer's documents from the network to the vendor's system. Vendors may access the network by various means. Access may be via dial-up modem or via an Internet utility.

Various means of carrying data among the customers, vendors, and DSCP are being considered at this point. Toll-free 1-800 lines will not be used overseas. Vendors will need to rely on other means of accessing STORES. One of the most likely scenarios uses the Internet to pass and receive transactions. This may require that the vendor use an Internet service provider to access STORES.

1.7 Standards

DSCP subscribes to the American National Standards Institute (ANSI) X12 standards. The version supported in the purchase order transaction set is Version 3 Release 4 Subrelease 2. Version 3060 may also be supported in future releases of STORES. ANSI X12 documentation may be obtained from:

EDI Support Services, Inc.
PO Box 203
Chardon, Ohio 44024
1-800-334-4912

1.3 Parties Involved

There are approximately 220 military bases participating CONUS-wide with an approximate total of 500 purchasing locations. There will be an estimated 50 military bases participating in the European Theater with approximately 50 ordering locations. The central coordination for all activity is DSCP located in Philadelphia, PA. DSCP also has a support office in Europe, designated DSCP-E, which will play a role in Prime Vendor Europe.

Orders to be sent via EDI are determined by the customer's purchasing locations at the military base. These locations can be a dining facility, warehouse, depot, hospital, ship, child care center, or other facility. The purchasing locations are determined by the needs of the customer.

It is assumed that the participating vendor will handle via one EDI communication point all customer orders for any location within the contract geographical area. Other vendor or distributor's participation levels may be negotiable, and should be discussed with the DSCP EDI Coordinator.

1.4 Transaction Sets

When the customer sends the 850 Purchase Order to the vendor, a summary transaction is also sent to DSCP via EDI. This summary transaction contains only a total purchase order dollar amount and number of food items ordered. When the customer receives the goods ordered, quantities received are recorded using the STORES system. Once the receipts are approved and released, the 861 Receipt transaction set is used to send the details to DSCP. Vendors may receive copies of the 861 Receipt if desired.

Customers will not issue order cancellations via EDI. Vendors will not directly notify the customer of price changes, term changes, or deletions. The vendor sends this information via EDI to DSCP via the 832 Catalog transaction set. Once the appropriate updates are completed on the STORES MIS catalog, DSCP will send the 832 transaction set to all customers with the updated catalog information.

The EDI transaction sets are described in detail in later sections of this guideline. Vendors must be able to support the 850 Purchase Order, 832 Catalog, 997 Functional Acknowledgment, and, if desired, the 861 Receipt.

1.2 EDI - How It Works

Orders are generated on a regular basis by the customer's requisition systems or keyed in by the customer and sent electronically to the vendor. The order data is passed through EDI translation software where it is converted into a standard structured format and a file is generated for the vendor. The system which performs this translation and transmission from the military customer's ordering point is the Subsistence Total Ordering and Receipting Electronic System (STORES).

Purchase orders are transmitted electronically to a network on a daily basis. The customer may order more than once a day. The network processes the files into the vendor's mailbox where the orders are held awaiting pick-up by the vendor. Replies are sent to the network by vendors to acknowledge that the transmission was received. These acknowledgments are picked up later by each customer's system. Each party communicates with the network which greatly simplifies the process.

When the network delivery to the vendor is complete, optimal use of the data by the vendor will be achieved when the vendor converts the purchase order data from the standard transmission format into their own internal format. Vendor processing can then occur without having to key the purchase order data.

Vendors provide initial and updated catalog item and price data via EDI. This data is transmitted to the Defense Personnel Support Center (DSCP) and not directly to the customer.

G. Place of Performance

There will be no evaluation on place of performance.

H. Socioeconomic Considerations

The Government will evaluate the offeror's socioeconomic plan to ensure that, to the maximum extent practical, small, small disadvantaged, women-owned small businesses and hub-zone small businesses are used as both suppliers and subcontractors in support of this Prime Vendor contract. The Government will evaluate the participation levels in terms of percentages and dollar values and comparatively assess the goals amongst the offerors. The Government will also perform a risk analysis of the offeror's Socioeconomic goals by evaluating organizational efforts - the measures that the offeror will take to ensure equitable opportunity, and further the opportunities, for small business (SB), small disadvantaged business (SDB), women-owned small business (WOSB) and Hub zones small business (HZSB) firms will be evaluated. This assessment can enhance or detract from the overall factor ranking. Offerors that are small business concerns will receive additional credit. Large business concerns must include a Small Business and Small Disadvantaged Business Subcontracting Plan. This plan shall be evaluated for compliance and acceptability only.

I. DLA Mentoring Business Agreement (MBA)

The Government will evaluate the offeror's response to participating in the DLA MBA Program and its ability to mentor firms. The scope of the plan will also be evaluated. The responses from offerors on the MBA Program will be evaluated on a comparative basis amongst all offerors. **The offeror(s) indicating the most comprehensive plan(s) will receive the highest rating; this rating will be further enhanced if the offeror identifies new business ventures rather than expansion of existing agreements.** This evaluation will also be used to determine the offeror's willingness to assist SB's, SDB's and WOSB's in expanding their business.

J. Javits-Wagner-O'Day Act (JWOD)

The Government will evaluate the offeror's JWOD proposal on a comparative basis among all offerors per 52.215-9004 DLAD. An offeror that proposes or demonstrates a higher percentage, complexity level, and variety of participation by JWOD qualified nonprofit agencies for the blind or other severely disabled as subcontractors beyond those items for which JWOD entities are the mandatory source generally will receive a higher rating. Offeror's proposals for such support will be made a part of any resulting contract for use in determining how well the contractor has adhered to its plan. Offeror is required to submit percentages supporting this program on a monthly basis to the Contracting Officer within the Socioeconomic Report.

EVALUATION FACTORS FOR AWARD

BUSINESS PROPOSAL EVALUATION

The following evaluation criteria are listed in descending order of importance. Aggregate Pricing (Factor I) is relatively more important than Distribution Pricing (Factor II) and so on. However, as the difference in the aggregate prices of technically equal offers decrease, the importance of distribution pricing will increase. Factors A and B are significantly more important than the remaining factors.

A. Aggregate Pricing

The Government will evaluate the offeror's proposed pricing on the items selected from the list of the highest usage items provided by the customers listed in this solicitation, see "Prime Vendor Schedule of Items", pages 109-115. The estimated quantities shall be multiplied by the unit prices to determine the lowest overall cost to the Government. These figures will then be totaled to arrive at an estimated aggregate value. Pricing will be evaluated for all option years in the same manner. All five (5) totals will be added together to determine the lowest overall cost to the Government.

B. Distribution Prices

The Government will evaluate each offeror's distribution prices by determining an aggregate dollar value. This will be determined by multiplying the distribution prices by the estimated yearly requirements for the items listed in the solicitation. The aggregate dollar value will then be evaluated for reasonableness and overall low cost to the Government. Distribution prices, for all option years that do not relate to the market basket items will be evaluated for fairness and reasonableness. The percentage of distribution fee to total aggregate cost will also be evaluated.

C. Product Listing

The Offeror's current product listing shall be used for informational purposes and will not be evaluated under the Business Proposal.

D. Procurement Pricing Plan

The Offeror's procurement pricing plan shall be used for informational purposes and will not be evaluated under the Business Proposal.

6. Procedures and response times for handling emergency orders over and above solicitation requirements will be evaluated.

7. The offeror's policy for pursuing, managing and collecting rebates, discounts and allowances. The method of return shall be in the form of an up-front price reduction /off invoice reduction in price to the Government.

The offeror shall address how rebates, discounts, and allowances, as a result of manufacturer or broker's specials, **other than** the NAPA Program or Food Shows, are to be returned to the Government. Describe the process for tracking and reporting of rebates, discounts, and allowances, method of return (i.e. lump-sum reimbursement) and overall management of the program. **The Government's preferred method of receiving rebates, discounts, and allowances is "up-front" (off invoice) price reductions, resulting in a lower invoice/unit price to the customer.** The offeror will provide a description of those rebates and discounts meeting the requirements herein.

inventory rotation methods, level of automation, identification and correction of discrepancies, and receipt, storage and out bound movement of products.. Inventory control systems and monitoring procedures will be assessed. Offeror will be required to identify key personnel responsible for ensuring quality procedures are monitored.

C. Inspection and Sanitation Procedures

1. The Government will assess the offeror's proposed inspection procedures, including type, frequency and amount of inspection to ensure that proper procedures are maintained. Procedures to ensure that the order conforms to the items ordered, has the proper shelf life-dating, is free of damage and meets industry standard for product quality, will be evaluated.

2. The offeror's Sanitary Control Procedures and Stored Product Pest Management Program will be evaluated. This evaluation will include sanitary inspection reports and any ratings as applicable (e.g. AIB, ASI)

E. Surge/ Mobilization / Readiness

1. The Government will evaluate the offeror's ability to support "surge" requirements. The capability to swiftly react to this situation will be assessed.

3. The firm's readiness plan will be assessed for completeness and ingenuity.

FACTOR III

QUALITY ASSURANCE PLAN

The Sub-factors for Quality Assurance Plan are of equal importance.

A. Supplier Selection Program

1. The Government will evaluate the offeror's supplier selection program. This evaluation will be conducted to determine the effectiveness of the program to provide continued supply of quality products with minimal variation. The Government will evaluate the offeror's methods to ensure that standardized product quality will be maintained when products are received from various suppliers.

B. Quality Control and Assurance Procedures

The Government will assess the offeror's procedures to be employed to ensure orders are filled accurately and completely to meet the delivery schedule, including an evaluation of the previous year's performance data.. The current performance levels for mis-picks, damage, short on truck, etc. will be evaluated.

EVALUATION FACTORS FOR AWARD
TECHNICAL PROPOSAL EVALUATION – PART I

The following evaluation criteria are listed in descending order of importance at the factor level. Each factor will state the importance of its subfactor. The Government will make a risk assessment based on information contained in the proposal and other information, which has or may be derived from sources other than the proposal. This risk assessment will be evaluated in the rating for any factors and/or subfactors that place the Government at risk.

FACTOR I

CORPORATE EXPERIENCE / PAST PERFORMANCE

The Government will perform an integrated assessment of the offeror's corporate experience and past performance. This assessment will also be performed for any partner that will perform in support of the proposed contract. (Note: Regardless of an offeror's years of experience, past performance will carry more weight in an integrated assessment). The Government will evaluate the offeror's experience in fulfilling requirements of similar dollars and volume for other customers in a Prime Vendor/regular dealer capacity, to include Government contracts, if any. This part of the evaluation will be based on the offeror's proposal, as well as any in-house Government records, if applicable.

The Government will evaluate the offeror's record of past performance both as a regular dealer/prime vendor and with Government contracts, if any, to determine whether the firm has a successful history of conforming to contractual requirements or business agreements, a commitment to customer satisfaction, timely delivery of quality products, providing consistently high fill rates, and service.

Offerors will also be evaluated on socioeconomic issues of past and present contracts (both Government and Commercial). Offerors that do not have records of past performance on socioeconomic issues will neither be rated favorably or unfavorably.

The above evaluation will also be performed for any partner involved in the proposed contract. The Government will assess the prime vendor's, or partners experience on contracts that in whole or when combined with other contracts, replicate the size and complexity of this solicitation. Firms that demonstrate significant experience in the above areas will be rated more favorably than those firms that do not.

When evaluating Past Performance, the offeror's written proposal, Government in-house records and information provided by the points of contact or reference designated by the offeror will be taken into account. This agency's personal experience with the offeror (if any) will be considered more significant than information provided by outside references.

resulting from discussions will undergo further technical and business evaluations. Finally, a proposal will be selected for award by the SSA, as described in paragraph below.

(2) Evaluation Process.

(a) Technical Evaluation Process - Offerors are required to present a portion of the technical information orally and to submit the remainder of the technical proposal in writing, as prescribed in the section of this solicitation entitled **Submission Requirements**. Each technical proposal will be evaluated by the Technical Evaluation Panel against the technical factors specified in paragraph (a) above. Proposals so technically deficient as to make them technically unacceptable will be rejected as unacceptable, regardless of the cost or price offered. No discussions will be held with rejected offerors, nor will any rejected offeror be given an opportunity to revise its offer to correct deficiencies in order to become acceptable after the date and time specified for the receipt of offers.

(b) Business Evaluation Process - Each proposal will be evaluated against the requirements of the solicitation. The Government will evaluate the offeror's delivered prices on a market basket of items (Schedule of Items). A separate evaluation will also be made of the distribution prices provided for the market basket items. Distribution prices for items or categories not related to the market basket items will also be evaluated for reasonableness. The Government will evaluate limited pricing data with the initial proposals and during discussions, in accordance with FAR 15.4. The Government will evaluate all offeror's proposals to determine cost or price realism. Cost or price realism will demonstrate an offeror's understanding of the requirements of the solicitation. The estimated quantities will be multiplied by the unit prices to determine the lowest total aggregate price to the Government. Aggregate distribution prices will be calculated in the same manner. Option prices will also be evaluated in the same manner. All five (5) totals (base year and four option years) will be combined to determine the lowest overall cost to the Government. The total Aggregate Price is relatively more important than Distribution Pricing. **However**, as the difference in the total aggregate prices of technically equal offers decrease, the importance of distribution pricing will increase.

(3) Selection Process.

The final technical and business evaluation reports will be furnished to the Contracting Officer by the Evaluation Panels. The Contracting Officer will prepare a written recommendation for award and forward it to the SSA. It is the ultimate decision of the SSA to determine which offeror receives the award.

EVALUATION FACTORS FOR AWARD

GENERAL

(A) The Government will award a contract resulting from this solicitation to the responsible offeror whose offer conforming to the solicitation will be most advantageous to the Government, price and other factors considered. The following Technical factors (listed in descending order of importance) shall be used to evaluate offers:

- I. Corporate Experience/Past Performance
- II. Distribution/Delivery System
- III. Quality Assurance Plan
- IV. Customer Service Plan

Technical proposal is significantly more important than cost or price. However, when proposals become equal in technical merit, the evaluated cost or price becomes more important. As technical merit and the evaluated cost or price become essentially equal, other factors as listed below, may be used as discriminating elements for determining the selection of a source among otherwise substantially equal offers. They are listed in descending order of importance:

- (1) Small Disadvantaged Business Concerns;
- (2) Small Business Concerns which are also Women Owned Small Business Concerns;
- (3) Other Small Business Concerns;
- (4) Other concerns which are Women Owned Business Concerns

(B) *Options.* The Government will evaluate offers for award purposes by adding the total price for all options to the total price for the basic requirement. The Government may determine that an offer is unacceptable if the option prices are significantly unbalanced.. Evaluation of the options shall not obligate the Government to exercise the option(s).

(C) A written notice of award or acceptance of an offer, mailed or otherwise furnished to the successful offeror within the time for acceptance specified in the offer, shall result in a binding contract without further action by either party. Before the offer's specified expiration time, the Government may accept an offer (or part of an offer), whether or not there are negotiations after its receipt, unless a written notice of withdrawal is received before award.

(D) *Source Selection and Evaluation Procedures*

- (1) Summary.

Subsequent to the date specified in the solicitation for receipt of proposals, all timely proposals will undergo a technical and business evaluation as described in paragraph below. The Contracting Officer may make a competitive range determination based on these evaluations, and submit it to the Source Selection Authority (SSA) for approval. The Government reserves the right to make award based on initial proposals. If award is not made based on initial proposals, written and/or oral discussions will be conducted with all offerors in the competitive range. Final revised offers

- 1) Provide milestones for program implementation.
- 2) Discuss and describe the measurements/yardsticks that will be utilized to determine if program objectives and goals have been met. Projections of successful program measurements should result in:

 - b) An improvement in the level of participation in DoD, other federal agencies and commercial contracting opportunities.

E. PRIME VENDOR (MARKET BASKET) SCHEDULE OF ITEMS

1. Delivered prices for the following items should be based on the last delivered price (“landed cost”) during the full week (Monday through Friday) two weeks prior to the closing date of this solicitation. If the price used is not based on pricing for the period two weeks before the closing of this solicitation, your price should include the date of acquisition.

THE PRIME VENDOR SCHEDULE OF ITEMS FOR THE ARIZONA ZONE IS ATTACHED ON THE FOLLOWING PAGES. YOUR MOST CURRENT SUPPLIER INVOICE FOR THESE ITEMS MUST BE SUBMITTED WITH YOUR OFFER.

PLEASE FURNISH PRICES PER POUND FOR ITEMS THAT SPECIFY WEIGHT RANGES.

Firms shall offer a distribution price for each category of items. ***The distribution price must be offered as a dollar/cents amount.*** Distribution prices offered as a percentage of the delivered price **are not acceptable.** The distribution price shall represent the amount to be added to the actual invoice price paid by the prime vendor for each food and beverage product to the manufacturer or supplier.

2. Offerors are strongly urged to use the Government's Category List as outlined in paragraph D of the section entitled "Supplies/Services and Prices" when submitting their Distribution Prices. 4. The distribution prices shall remain constant for the complete term of the contract.

SUBMISSION REQUIREMENTS
BUSINESS PROPOSAL - PART II

THIS PORTION MUST BE SUBMITTED IN WRITING

A. PRICING

1. An evaluation will be made against items selected from the highest usage items and general food supplies provided by the customers supported under this solicitation, as well as items listed under the Basic Daily Food Allowance (BDFA) listing. Estimated annual quantities for the items selected are indicated next to each item and are for information and evaluation purposes only. The items will be weighted against the estimated yearly requirements of the ordering activities and evaluated for the lowest overall aggregate cost to the Government. A separate evaluation will be made of the offeror's distribution pricing, using the same market basket of items.

2. Offerors are to submit the most current unit prices for each of these items. This unit price must be in a format that shows the delivered price and the distribution price as separate entries, then totaled. For example, if the delivered price is \$2.00 and the distribution price is \$.50, pricing should be formulated as follows:

$$\text{\$ 2.00} + \text{\$.50} = \text{\$ 2.50}$$

Do Not Submit only the Unit Price; the two (2) elements must be shown separately as two separate evaluations are being performed.

Do not deduct any NAPA allowances from the delivered price on your business proposal.

3. **Prices must not extend more than two (2) places to the right of the decimal point.** Standard rounding methods should be observed. For example, a delivered price of \$4.578 plus a distribution price of \$.232 should be rounded to \$4.58 plus \$.23.

4. If an offeror carries a variety of brands for the same item, the price submitted shall be for the lowest price, technically acceptable, item that meets the Government's requirements.

7. Explain how rebates, discounts and allowances as a result of manufacturer or broker's specials, other than the NAPA Program or Food Shows, are to be returned to the Government. Describe the process for tracking and reporting of rebates, discounts and allowances, method of return (i.e. lump-sum reimbursement, deviated pricing) and overall management of the program. The preferred method of return is off the invoice reduction in price to the Government. Provide a description of those rebates and discounts meeting the requirements herein.
8. It is the Government's goal to strive for continuous improvement in the quality of DSCP's process, products and service to our customers. DSCP works towards achieving continuous improvement to keep our customer satisfied. Your firm's range of services may span many areas outside the minimum requirements of the Government and in particular this solicitation. Describe how your firm might assist the DSCP in the above area. Your response will be reviewed and may be considered an enhancement to your overall proposal.

C. The complete technical proposal will be comprised of the following components:

- 1. Written Technical Proposal**
- 2. Formal Oral Presentation**
- 3. Structured Plant Site Visit**

III. FORMAL ORAL PRESENTATION/STRUCTURED PLANT SITE VISIT

A. What is a "Formal Oral Presentation/Structured Plant Site Visit"?

1. A Formal Oral Presentation/Structured Plant Site Visit is a technique, which provides offeror's with an opportunity to present information through verbal means as a substitute for information traditionally provided in written form under the cover of the offeror's proposal. The Formal Oral Presentation /Structured Plant Site Visit is NOT a mere restatement or replication of the written proposal information but IS IN LIEU OF IT. The purpose of using the Formal Oral Presentation/Structured Plant Site Visit technique is to eliminate, or greatly reduce, the need for written material, where information can be conveyed in a more meaningful and efficient way through verbal means.

2. One of the benefits of the Formal Oral Presentation/Structured Plant Site Visit is that it permits the evaluators to receive information as to the capability of the offeror, generally demonstrating its understanding of the work. It also allows the evaluators to view the offeror's facility(ies) and business operations, allowing the offeror and key members of the offeror's team to describe how the work will be performed while the evaluators observe the offeror's team that will actually perform the work.

3. The site visit portion also allows the evaluators to verify what is presented in the more formal oral and written presentations.

IV. INSTRUCTIONS FOR FORMAL ORAL PRESENTATION/STRUCTURED PLANT SITE VISIT

A. A portion of the Technical Proposal will be submitted to the Technical Evaluation Panel (TEP) via a Formal Oral Presentation/Structured Plant Site Visit. The order in which Formal Oral Presentation/Structured Plant Site Visit occur will be randomly selected, with adjustments to facilitate Government travel plans, if appropriate. The Formal Oral Presentation/Structured Plant Site Visit will be conducted at the offeror's location of business. The date of the Formal Oral Presentation/Structured Plant Site Visit will be confirmed within five (5) working days after the solicitation closing. **Offerors are requested to indicate in the written technical proposal what days would not be convenient for an oral presentation. All attempts will be made to accommodate such scheduling conflicts.** Once the date for the Formal Oral Presentation/Structured Plant Site Visit is set requests for changes of the date **will not** be entertained. It is anticipated that the Formal Oral Presentation/Structured Plant Site Visit will begin approximately 10 working days after solicitation closing.

capability to support the customers' requirements in the most efficient, cost-effective manner. Proposals will be evaluated in accordance with the factors listed in the solicitation. The rating methodology will be adjectival, i.e., Excellent, Good, Fair and Poor.

C. For each factor the agency will make a risk assessment based on information contained in the proposal and other information, which has or may be derived from sources other than the proposal. This risk assessment will be evaluated in the rating for any factors that place the Government at risk.

D. In order to receive full consideration, firms are encouraged to ensure that the information provided in the Technical Proposal is factual and complete. To ensure that an accurate evaluation of the proposal is made, please address each sub-factor within each factor (written or formal oral presentation) in the order in which they appear in the solicitation. Failure to do so may result in the Technical Evaluation Panel overlooking important information. **REMINDER: Your site visit presentation is part of your technical proposal. Please address each sub-factor within each factor to be evaluated during your site visit presentation.**

E. The Technical Proposal shall be used for evaluation purposes only and is not considered to be part of the contract. *The Government does, however, reserve the right to incorporate into the resultant contracts, those elements of an offeror's technical proposal that exceed solicitation requirements.* The Business Proposal "Market Basket of Items" delivered prices are essentially for evaluation purposes. However, these prices should not dramatically change for orders placed early in the contract unless documented market conditions arise.

F. Offeror's may provide additional technical information that will enhance the proposal; however, overly elaborate proposals that contain information not pertinent to this acquisition are not desired.

G. The Government reserves the right to verify any information presented in the technical and business proposals.

II. VOLUME I, TECHNICAL PROPOSAL

The following applies to both the written portion of the Technical Proposal as well as the Formal Oral presentation/Formal Structured Plant Site Visit.

A. The written technical proposal and Formal Oral Presentation and Formal Structured Plant Site Visit must demonstrate the offeror's ability to meet the Government's requirements as set forth in the solicitation. Failure to provide information as requested in any of the technical factors identified may be considered a "no response" and may not be ratable or may warrant a "Poor" rating for the applicable factor, sub-factor, element or sub-element.

B. Firms should prepare proposals and address elements in the same order as presented in the solicitation to facilitate the Government's review and evaluation of your proposal. Continuation sheets shall clearly identify the solicitation number and the offeror's name on each page.

If the offeror fails to indicate in its written offer the names of those people who will be presenting at the "Formal" Oral Presentation, then the presenter will be restricted to the individual who signed the proposal.

(ii) Evaluations for each volume of the proposal will be performed exclusive of one another. Therefore, the Technical Proposal shall contain no reference to cost or pricing data. Conversely, the Business Proposal should not address information requested under an element listed as a technical factor. Cost and Price information shall only be contained in Volume II, Business Proposal. Each volume shall be bound separately and labeled appropriately.

B. Proposals will be evaluated for both technical excellence and price reasonableness in accordance with the evaluation criteria outlined in the "*Evaluation Factors for Award*" section of this solicitation. Protests filed with the activity should be addressed to the contracting officer, but should clearly state that they are an "Agency Level Protest under Executive Order 12979." The contracting officer will forward the protest to the appropriate official for decision. (This process allows for a higher level decision on the initial protest; it is not a review of a contracting officer's decision on a protest filed with the contracting officer.) Absent a clear indication of the intent to file an agency level protest, protests will be presumed to be protests to the contracting officer.

**52.219-9003 DLA MENTORING BUSINESS AGREEMENTS (MBA)
PERFORMANCE (DEC 1997) DLAD**

(a) The contractor's proposed MBA plan shall become part of this contract upon award. The contractor is hereby obligated, as part of its contractual undertaking, to enter into a written, binding mentoring business agreement with a protégé based on and reflective of this plan. Performance under the MBA plan shall be evaluated by the contracting officer, and may become a consideration prior to option exercise for the follow-on years of long-term contracts. MBA plan implementation may also become an independent evaluation factor and/or part of the overall past performance evaluation factor in future source-selection decisions.

(b) The contractor-mentor and its protégé(s) shall meet semi-annually with the DLA contracting officer and the small business specialist(s) from the buying activity and/or the DCMC component to review progress/accomplishments under applicable MBA proposals. The contractor is also required to submit periodic progress reports (no less frequently than annually) to the contracting officer regarding proposal fulfillment. Any MBA with a protege that has voluntarily been submitted to the Government shall be compared by the contracting officer to the contractor's proposed plan, hereby incorporated into this contract, to ensure that it adequately reflects the mentor's obligations expressed therein.

52.219-16 LIQUIDATED DAMAGES—SUBCONTRACTING PLAN (JAN 1999)

(a) "Failure to make a good faith effort to comply with the subcontracting plan", as used in this clause, means a willful or intentional failure to perform in accordance with the requirements of the subcontracting plan approved under the clause in this contract entitled "Small Business Subcontracting Plan," or willful or intentional action to frustrate the plan.

(b) Performance shall be measured by applying the percentage goals to the total actual subcontracting dollars or, if a commercial plan is involved, to the pro rata share of actual subcontracting dollars attributable to Government contracts covered by the commercial plan. If, at contract completion or, in the case of a commercial plan, at the close of the fiscal year for which the plan is applicable, the Contractor has failed to meet its subcontracting goals and the Contracting Officer decides in accordance with paragraph (c) of this clause that the Contractor failed to make a good faith effort to comply with its subcontracting plan, established in accordance with the clause in this contract entitled "Small Business Subcontracting Plan," the Contractor shall pay the Government liquidated damages in an amount stated. The amount of probable damages attributable to the Contractor's failure to comply shall be an amount equal to the actual dollar amount by which the Contractor failed to achieve each subcontract goal.

(c) Before the Contracting Officer makes a final decision that the Contractor has failed to make such good faith effort, the Contracting Officer shall give the Contractor written notice specifying the failure and permitting the Contractor to demonstrate what good faith efforts have been made and to discuss the matter. Failure to respond to the notice may be taken as an admission that no valid explanation exists. If, after consideration of all the pertinent data, the Contracting Officer finds that the Contractor failed to make a good faith effort to comply with the subcontracting plan, the Contracting Officer shall issue a final decision to that effect and require that the Contractor pay the Government liquidated damages as provided in paragraph (b) of this clause.

52.217-9P13 EVALUATION OF OPTIONS SOURCE SELECTION FOR AN INDEFINITE DELIVERY, INDEFINITE QUANTITY CONTRACT (JAN 1992) ALTERNATE 1 (MAY 1997) DSCP

(a) For award purposes, in addition to an offeror's response to the base ordering period, the Government will evaluate its response to all options, both technical and price. To evaluate price, the Government will add the total price for all options to the total price for the base ordering period. Further, where a contract line or sub-line item number in the Supplies or Services and Prices Section specifies a minimum and maximum quantity, the maximum quantity will be used to determine the total price. Evaluation of options will not obligate the Government to exercise the options. For this solicitation, the options are as specified in Clause 52.217-9P12.

(b) Should offerors propose option prices which vary (for example, with quantities actually ordered and the dates when ordered), these offers will be evaluated using the highest option price offered for each item.

52.219-9002 DLA MENTORING BUSINESS AGREEMENTS (MBA) PROGRAM (DEC 1997) DLAD

(a) The offeror is invited to participate in a program whereby small, small disadvantaged, and women-owned small business are afforded the opportunity (through the offeror's provision of developmental assistance in its capacity as prime contractor) to participate in the DLA procurement process. (The offeror may alternatively propose to mentor a Javits-Wagner-O'Day (JWOD) Act-qualified nonprofit agency) In order to participate, the offeror shall submit a proposal outlining the assistance already rendered or to be provided to the protégé, as well as the kinds of value-added activity the offeror might expect to receive, in return, from the mentored entity. The offeror-mentor may propose to provide the benefit of its managerial expertise, technical capabilities, market knowledge, etc.; the protégé will be expected to provide a specialized service or product, or potentially, admission into its own market. Participation is entirely voluntary.

(b) The Government will evaluate the offeror's proposal for participation in the DLA MBA Program on a comparative basis among all offerors, rather than via establishment of an "acceptable" standard. The factor is an independent element in the overall award decision; the offeror who proposes or demonstrates the most comprehensive plan for tutoring a protégé will receive the highest rating for this evaluation factor during the source selection process. The evaluation will assess the offeror's willingness to assist such entities in receiving better market shares, improving their processes, and generally contributing to their viability under long-term contracting arrangements.

(c) The proposal submitted by the successful offeror will be incorporated into its contract with DLA. The successful offeror will be expected to incorporate the salient points of the evaluated proposal into a written agreement (the MBA) with a protégé selected by the offeror. The offeror's performance under the proposal will be monitored by the contracting officer and cognizant small business specialists (from the he buying activity and/or the Defense Contract Management Command) during the contract period. This performance will be one factor used to determine placement of orders against multiple-award contracts and/or exercise of options in the contract's follow-on years (as applicable). It will also be used as an independent evaluation factor, and as an element of past performance evaluation, in subsequent source selection decisions.

**52.217-9P12 OPTION FOR INDEFINITE-DELIVERY, INDEFINITE-QUANTITY
CONTRACT TERM EXTENSION (JUL 1998) DSCP**

(a) Acceptance of the option provision(s)/clauses contained herein is mandatory. Failure to indicate acceptance of the option by annotating the offeror's option price in the schedule or elsewhere in the solicitation will be deemed non-acceptance of the option and may result in rejection of the offeror's entire bid/proposal.

(b) Offerors may offer options at unit prices which differ from the unit prices for the base ordering period. These prices may vary with the quantities actually ordered and the dates when ordered.

(c) The contracting officer may extend the term of this contract for four [4] additional one [1] year period(s) by written notice to the contractor within the time specified in the schedule; provided that the contracting officer shall give the contractor a preliminary written notice of intent to extend at least 60 days before expiration of the contract. The preliminary notice does not commit the government to an extension.

(d) Performance under the option period shall continue at the same performance level specified for the basic contract.

(e) The option to extend the term of the contract shall be exercised not later than three (3) days before the expiration date of the contract.

(f) The option is deemed exercised when mailed or otherwise furnished to the contractor.

(g) If the contracting officer exercises this option, the extended contract shall be considered to include this option clause and the minimum and maximum quantities specified in the award for that option period will apply. The modification exercising the option will also modify DSCP clause 52.217-9P16, Effective Period of Contract--Indefinite-Delivery, Indefinite-Quantity Contract, to cover the base ordering period and the additional option period(s) exercised to date.

(h) The total duration of any options exercised under this clause shall not exceed one year.

(i) The following provisions apply only to negotiated acquisitions:

(1) If an option has been priced under this solicitation and is to be exercised at time of award of the basic contract, the submission of certified cost or pricing data shall be required prior to award where the combined dollar value of the basic contract and option exceeds \$500,000, unless an exemption thereto is appropriate in accordance with FAR 15.403-1.

(2) Prior to the award of any contract which will contain one or more priced options totaling \$500,000 or more, the submission of certified cost or pricing data covering the basic contract and the option(s) shall be required regardless of when the option(s) may be exercised, unless an exemption thereto is appropriate in accordance with FAR 15.403-1.
